

ZOLLER Tool Trolley

The ZOLLER tool trolley is used to safely transport tool holders, adapters, and tools, and is a useful addition to any presetting and measuring machine.

ZOLLER tool trolley standard configuration

ZOLLER tool trolley including options

With the ZOLLER tool trolley, you'll always have your tool adapters, and tool holders safe and at hand beside your presetting and measuring machine. This robust solution for transportation and temporary storage of tools and tool components is ready for the shop floor.

The tool trolley can be equipped with various inserts for the interchangeable frames, making it ready to use with all kinds of tools.

A storage area for papers and drawings is attached to the body of the trolley.

The tool trolley consists of:

- Tool trolley body
- 5 interchangeable frames standard (optional max. 9) without inserts
- Inserts for the interchangeable tool frames
- Bottom storage board

Dimensions (H x W x D):

- 980 mm x 660 mm x 870 mm
- Interchangeable frame width 510 mm

Options:

- Additional interchangeable tool frame
- Drawers (max. 2)
- Side storage board
- Inserts for tools with SK, HSK, VDI, and other, see page 2

Benefits:

- Robust and shop floor-ready transportation
- Individually adjustable tool frames
- High load capacity for tools and tool holders
