

ASN : AERO SL - Non Metal

Silicon Carbide Wheels

Porosity and Abrasive grain spread evenly

- Small size of Porosity improves sharpness
- Large size improves effectiveness
- Heat reduction during grinding process
- PPM 16, 24, 36, 46, 60, 80 From high porosity to low porosity
- Mainly for Non-metal work piece such as plastic, rubber, aluminum, gold bar, ceramic, glass

Green Silicon Carbide Wheel

ASP : AERO SL - Precision

For Metal

Grinding with high quality and more effectiveness

- For grinding metal, hard and thin work piece
- Porosity PPM 36-46
- Better chip releasing which reduce accumulated heat during grinding process
- Various size upon request

SHAPE 1A

SA – EDR – SL

Porosity and Abrasive grain spread evenly Various colors

Mainly for metal work piece such as iron, stainless steel
